

JFES LICENSE

Software Licence Agreement

JFES • Public Artifact • Version 1.0

LICENSOR: PORTALZ PTY LTD (AU)

Commercial / for-profit use requires a licence from the Licensor.

Licensing contact: licensing@portalz.solutions

1. Grant of Licence

Subject to the terms of this Licence, the Licensor grants the Licensee a limited, non-exclusive, non-transferable licence to install and use JFES within the scope of the applicable licence. Any commercial or for-profit use of JFES requires a licence from PORTALZ PTY LTD (AU).

2. Permitted Use

- Use JFES to perform encryption and decryption operations supported by the published JFES API.
- Integrate the public JFES API into applications in accordance with the applicable licence.
- Configure the permitted JFES Silo and Pass settings exposed by the public API.
- Make reasonable operational copies necessary for authorised installation, backup, deployment, and use, subject to applicable law and this Licence.

3. Restrictions

Except where expressly permitted by this Licence or required by applicable law, the Licensee must not:

- copy, reproduce, distribute, publish, sell, rent, lease, sublicense, or otherwise make JFES available to an unauthorised third party;
- modify, adapt, translate, or create derivative works of the JFES software;
- reverse engineer, decompile, disassemble, decode, reconstruct, or otherwise attempt to derive the source code, algorithms, implementation, internal architecture, Silo-generation mechanisms, or other underlying components of JFES;
- circumvent, remove, disable, or interfere with licensing, access-control, integrity, or other protective mechanisms included with JFES;
- extract, reproduce, or redistribute proprietary Silo material except as expressly authorised;
- use the software to create or distribute an unauthorised competing implementation based on JFES proprietary implementation details.

The prohibition on reverse engineering is subject to any rights that cannot lawfully be excluded or restricted in the jurisdiction applicable to the Licensee.

4. Intellectual Property

JFES, including its software, implementation, documentation, Silo material, names, branding, and associated intellectual property, remains the property of the Licensor and its licensors. This Licence grants rights of use only and does not transfer ownership or title.

5. Public JFES Artifact

The public JFES artifact may include minified and obfuscated JavaScript. Such processing is part of the production distribution of the software and does not grant the Licensee any right to reconstruct, de-obfuscate, reverse engineer, or reproduce the underlying implementation.

The public API is the supported integration boundary. Licensees should integrate through the documented FES object and its published functions rather than relying on internal implementation details.

6. Public Silos and Passes

Feature	Public JFES	Licensed Capability
Silos	10 Public Silos	Additional Silo generation where licensed
Passes	Up to 4	Up to 40

7. Security and Research

JFES is distributed as a cryptographic software product. Independent security analysis and responsible reporting of vulnerabilities are encouraged where authorised. Nothing in this Licence authorises access to systems, data, accounts, or deployments belonging to another party.

Nothing in this Licence is intended to prohibit a use that applicable law expressly permits and that cannot legally be excluded by contract.

8. Confidentiality of Licensed Materials

Where a licence includes non-public Silo material, generation capability, documentation, credentials, or other proprietary materials, the Licensee must keep those materials confidential and must not disclose them except to authorised personnel who require access for the licensed use.

9. No Unauthorised Redistribution

A Licensee may not redistribute a licensed JFES build, licensed Silo material, account credentials, generated proprietary Silo material, or other restricted licence components except where the applicable commercial licence expressly permits redistribution.

For licensing enquiries, contact licensing@portalz.solutions.

JFES may be used for evaluation, study, testing, and other non-commercial purposes subject to this Licence. Any use of JFES for commercial or for-profit activity requires a separate commercial licence issued by PORTALZ PTY LTD (AU).

Commercial / For-Profit Licensing

10. Termination

This Licence terminates automatically upon material breach, subject to any cure period required by applicable law or the applicable commercial agreement. Upon termination, the Licensee must cease unauthorised use and destroy or return restricted licensed materials as directed by the Licensor, except for copies required to be retained by law.

11. Disclaimer

JFES is provided subject to the terms of the applicable licence and any accompanying documentation. Except to the extent expressly stated in a separate commercial agreement, the software is provided without warranties beyond those that cannot lawfully be excluded.

12. Limitation of Liability

To the maximum extent permitted by applicable law, the Licensor will not be liable for indirect, incidental, special, consequential, or punitive damages arising from use of the software. Any mandatory statutory rights remain unaffected.

13. Compliance With Law

The Licensee is responsible for ensuring that its use, deployment, distribution, and export of JFES complies with applicable laws and regulations.

14. Governing Terms

The governing law, jurisdiction, commercial terms, licence duration, fees, and any support obligations should be specified in the applicable order, subscription, or commercial agreement. Where a commercial agreement conflicts with this document, the commercial agreement controls to the extent of the conflict.

15. Acceptance

By installing, accessing, or using JFES, the Licensee acknowledges that it has read and agrees to be bound by this Licence, except where a separate written licence agreement governs the use.
